EDUCATION

Indian Institute of Information Technology, Jabalpur

Bachelor of Technology

Major in Computer Science

Madhya Pradesh, India

Aug 2024 - Present

PROJECTS

CHATMIND

June 2025

- Developed a full-stack ChatGPT clone using Next.js 15, TypeScript, and Clerk authentication with real-time AI streaming capabilities and comprehensive user management
- Implemented advanced chat functionality including message editing, conversation archiving, and multi-format file upload supporting images, PDFs, and documents via Cloudinary integration
- Leveraged Zustand for state management and Vercel AI SDK with Groq's Llama 3 model to deliver seamless streaming responses with webhook support for external integrations
- Github: <https://github.com/PixelKnightDev/chatmind>

WEATHERLY

July 2025

- Engineered a dynamic weather application leveraging Next.js framework and Open-Meteo API to deliver real-time meteorological data with seamless geolocation integration, providing users with instant access to local weather conditions and forecasts.
- Crafted an intuitive, mobile-first interface using custom CSS styling and responsive design principles, ensuring optimal user experience across all devices while maintaining clean, modern aesthetics that enhance data readability.
- Successfully deployed to production on Vercel platform with continuous integration, demonstrating full-stack development capabilities and modern deployment practices for scalable web application
- Github: <https://github.com/PixelKnightDev/weather-app>
- Live link: <https://weather-app-nu-three-84.vercel.app/>

TECHNICAL SKILLS

- Languages: C/C++, Javascript, HTML, CSS, Python
- Developer Tools: VS Code, Figma, Git, Vercel, Github Actions, Docker, Postman, Firebase
- Frameworks and Databases: NEXT.js, React, MongoDB, TailwindCSS, Express.js, PostgreSQL, NodeJS

VOLUNTEERING

HACKBYTE 3.0

Assisted hackathon participants by connecting them with resources to support their development process.
