EDUCATION

- Indian Institute of Information Technology Jabalpur** Madhya Pradesh, India
Bachelor of Technology in Computer Science and Engineering August 2024 - Present

TECHNICAL SKILLS

- Programming Languages:** C, C++, JavaScript, Python, Go, HTML5, CSS3, SQL
- Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js, TailwindCSS, MongoDB, PostgreSQL
- Tools & Technologies:** Git, GitHub, Docker, Vercel, Firebase, VS Code, Postman, GitHub Actions, RESTful APIs
- Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Programming (Java), Database Management Systems, Computer Architecture and Organization

PROJECTS

- GLIMPSE** [Github](#), [Release](#)
Go, Data Structures, Terminal UI, Systems Programming Jun 2025
 - Designed and built an interactive terminal-based code search tool with real-time results, file previews, and editor integration
 - Implemented prefix-aware query caching to eliminate redundant filesystem scans during incremental typing, significantly reducing I/O overhead
 - Added session-based navigation allowing multiple files to be opened per run, enabling reuse of in-memory state for faster searches
- CLUSTIFY** [Github](#), [Live](#)
JavaScript, Firefox Extensions, Gmail API, OAuth 2.0 Aug 2025
 - Built a Firefox extension to bulk-delete Gmail messages based on user-defined keywords, targeting promotional and newsletter clutter
 - Integrated Google OAuth 2.0 authentication and Gmail API with secure token storage, validation, and automatic refresh handling
 - Implemented batch email deletion with pagination support to efficiently process thousands of emails while respecting API rate limits
- QUANTFORGE** [Github](#)
Python, FastAPI, React, TypeScript, PostgreSQL, WebSockets Nov 2025
 - Built a full-stack platform for designing, backtesting, and evaluating trading strategies on historical market data
 - Implemented backend services for data ingestion, strategy execution, and performance analytics including PnL and drawdown metrics
 - Designed REST APIs and WebSocket-based pipelines to stream real-time backtest progress and results to the frontend

EXPERIENCE & ACHIEVEMENTS

- BitByte Summer of Code - Runner Up** June - August 2025
Open Source Contributor, Web Development Track, IIIT Jabalpur
 - Secured runner-up position in the web development track in intra-college open source program among 100+ eligible participants through significant contributions to web development projects and collaborative software engineering practices
- Winner — CanYouHackIt Hackathon (Automation & Productivity Track)** September 2025
24-hour Intra-college Hackathon, Organized by The Programming Club, IIIT Jabalpur
 - Won first place in the Automation & Productivity track by building **Clustify**, a Gmail cleanup Firefox extension for bulk email deletion using keyword-based rules
- Competitive Programming Achievements** [Codeforces](#)
Data Structures, Algorithms, Problem Solving
 - Achieved 1088 rating on Codeforces demonstrating strong algorithmic thinking and problem-solving skills

LEADERSHIP & VOLUNTEERING

- Dev Wing Member - BitByte Programming Club** IIIT Jabalpur
Core Team Member, Technical Contributor, Event Organizer 2024 - Present
- HACKBYTE 3.0 - Technical Mentor** IIIT Jabalpur
Provided technical guidance to 200+ hackathon participants, mentored teams on full-stack development 2025
